KNIGHTSCOTE POND, HAREFIELD, GREATER LONDON

DESCRIPTION. Controlled by Uxbridge Rovers ACS this 15-peg pond is the perfect water for juniors and novices. This small, platformed venue has depths to 6 ft and some weed cover. The venue is absolutely stuffed with small mirror and common carp, most are from 8 oz to 4 lb with the odd 6 lb fish. Tench top out at 2 lb, the crucian carp run to 12 oz.

TACTICS. All the usual 'starter' tactics should catch you plenty of fish, especially small carp at this prolific pond. Pole, whip or waggler will all score with baits like soft pellet, maggot or caster. Corn is worth a try for the odd better carp and tench. Fish quite close-in on punched bread or

a small soft pellet for crucian carp. Use a dotted down pole float to detect bites.

GOOD SWIMS. The pegs near the car park bank get a lot of attention.
